NUTRI ACK POWDER FORM

- Helps to eliminate vitamin deficiency.
- Helpful for utilization from feed and prevention of low body weights.
- Supports the development of the skeleton.
- Supports the hair and wool quality.
- Used to eliminate the needs of Vitamin ACK during the milking and pregnancy period.

Ingredients:

Vitamins: Vitamin A, Vitamin C, Vitamin K3

Method of Application:

Unless advised otherwise by a veterinarian;

250 – 500 gr of NUTRI ACK can be used to 1 tonne water of drinking water.

Before applying, pre-mixture is recommended in warm water and then It can be poured into a water tank.

Packaging Shape: 100 Gr. and 1 Kilograms of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI AD3-E POWDER FORM

- NUTRI AD3-E use for reinforcement when there are lack of Vitamin AD3 and Vitamin E.
- Necessary for osteogenesis, seeing and growth.
- Regulates the calcium and phosphorus metabolism in the body.
- Protects cells that are important for immune system from oxidation.
- Achieve faster growth in lambs-calves.
- Increase the weight in fattening animals.
- Increase the hardness of bones to withstand large muscle masses.
- Increases the appetite at fattening animals.
- Stimulates the metabolism.

Ingredients:

Vitamins: Vitamin A, Vitamin D, Vitamin E

Method of Application:

Unless advised otherwise by a veterinarian;

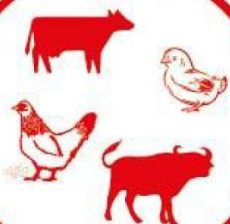

250 – 500 gr of NUTRI AD3-E POWDER can be used to 1 tonne of drinking water.

Before applying, pre-mixture is recommended in warm water and then It can be poured into a water tank.

Packaging Shape: 100 Gr. and 1 Kilograms of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI ADEK-C POWDER FORM

- Helps to eliminate vitamin deficiency.
- Helping for utilization from feed and low body weights to prevent.
- Supports the development of the skeleton.
- Supports the hair and wool quality.
- Used to eliminate the needs of Vitamin ADEK-C during the milking and pregnancy period.

Ingredients:

Vitamins: Vitamin A, Vitamin D, Vitamin E, Vitamin C, Vitamin K3

Method of Application:

Unless advised otherwise by a veterinarian;

250 - 500 gr of NUTRI ADEK-C can be used to 1 tonne of drinking water.

Before applying, pre-mixture is recommended in warm water and then it can be poured into a water tank.

Packaging Shape: 100 Gr. and 1 Kilograms of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI BCK POWDER FORM

It includes high quantity of B1, B2, B6, B12 Vitamins in order to meet the needs of vitamin of layer, broiler, chick, cattle, sheep, goat.

It is used for reinforcing the following cases;

Feed conversion, Low body weight, Lack of growth and development, Reduction in milk yield, Ended up throwing problems, Progeny incontinence, Low body weight of calves, Blind at birth of calves, Increasing benefit from the feed in livestock, Accelerating the live weight gain, Foot pain, paralysis and lameness, Reduction in the quality of wool and hair, eliminates the need of B vitamins in pregnancy and milking period.

Ingredients:

Vitamins: Vitamin B1, Vitamin B2, Vitamin B3, Vitamin B5, Vitamin B6, Vitamin B7, Vitamin B12, Vitamin K3, Vitamin C

Method of Application:

Unless advised otherwise by a veterinarian;

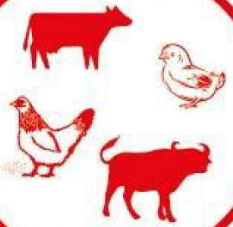

100 - 200 gr of NUTRI BCK can be used to 1 tonne of drinking water.

Before applying, pre-mixture is recommended in warm water and then it can be poured into a water tank.

Packaging Shape: 100 Gr. and 1 Kilograms of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI SELEN-E POWDER FORM

- Use for Selenium and Vitamin E reinforcing.
- Prevents delay in growth depends on the Selenium and Vitamin E deficiency.
- Avoid nutrition-related loss of reproductive efficiency.
- Use for Poor pasture-fed animals in terms of selenium.
- Indicated for prevention and treatment of muscular dystrophy, encephalomalacia.
- Exudative diathesis, low egg production, poor hatchability and stimulates antibody protection, improves resistance to disease.

Ingredients:
Vitamin E, Selenium

Method of Application:
Unless advised otherwise by a veterinarian;
Poultry: 250 gr of NUTRI SELEN-E POWDER can be used to 1 tonne of drinking water.
Calf: It is used 5-10 gr per animal/day.
Cow: It is used 40-50 gr per animal/day.
Sheep: It is used 10-20 gr per animal/day.
Lamb: It is used 5-10 gr per animal/day.

Packaging Shape: 100 Gr. and 1 Kilograms of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI OSTROMAX

It is a feed additive that includes Vitamin A, Vitamin E, Ferula Communis, Organic Zinc, Organic Selenium and Aroma. It is used at ruminants for estrus and infertility problems.

Ingredients:
Vitamins: Vitamin A, Vitamin E,
Organic Minerals: Organic Zinc, Organic Selenium
Other Ingredients: Ferula Communis, Aroma

Method of Application:
Unless advised otherwise by a veterinarian;
Dairy Cattle and Beef Cattle: It is used 50 gr per animal per day.
Sheep and Goat: It is used 5 gr per animal per day.

Packaging Shape: 100 Gr. and 1 Kilograms of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI FERTICOM

- NUTRI FERTICOM prevents hidden estrus cause of wrong nutrition, higher milk yield, poisoning, phosphorus and calcium deficiency of cattle and sheep, goat.
- Embryonic deaths and prostaglandin synthesis disorders due to deficiency of Vitamin E and Selenium.
- Used for vitamin, trace mineral and amino acid requirements for progeny incontinence problems; which develops due to lack of vitamin A, D3, E.
- In all cases of dehydration(diarea).
- In stress conditions.
- Used as an add in antibiotic therapy.
- Stimulates the metabolism.
- Improves feed conversion.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B1, Vitamin B2, Vitamin B3 (Niacine), Vitamin B6, Vitamin B12, Vitamin C

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium, Magnesium, Calcium, Phosphorus.

Amino Acids: DL-Methionine, L-Lysine

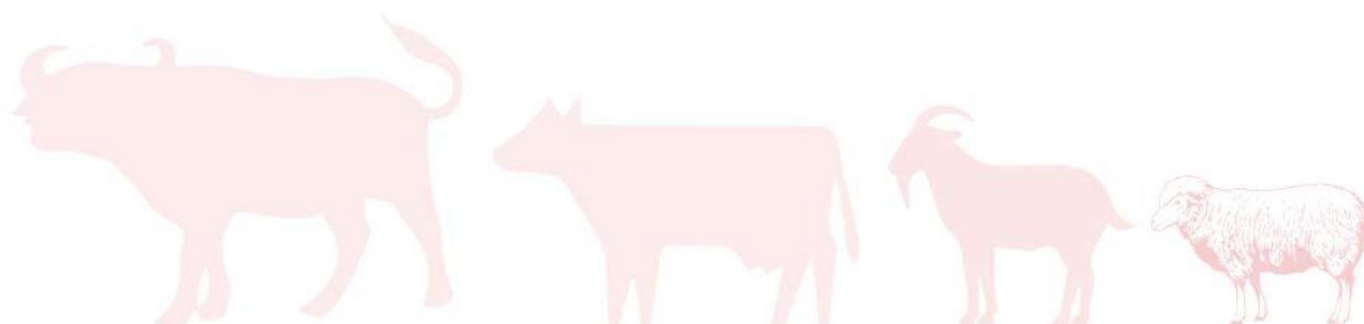

Other Ingredients: Choline Chloride, Sacc. Cerevicia 1026, BHT.

Method of Application:

Unless advised otherwise by a veterinarian;
It can be used 20 gr for each animal per day.

Packaging Shape: 100 Gr. and 1 Kilograms of plastic packing.

Storage: It should be protected from moisture
and stored in the dry, cool and dark places.

NUTRI C + POWDER FORM

NUTRI C+ is used to prevent the efficiency losses that may occur due to heat stress especially in the summer.

- Reduces heat stress.
- Increases utilization from feed.
- Strong antioxidant effect.
- Prevents fatty liver.
- Regulates blood sugar levels.
- Increases the survival rate in viral diseases.
- To stimulate body defences during adverse stress conditions, in addition to antibiotic therapy and in detoxification

Ingredients:
Vitamin C

Method of Application:

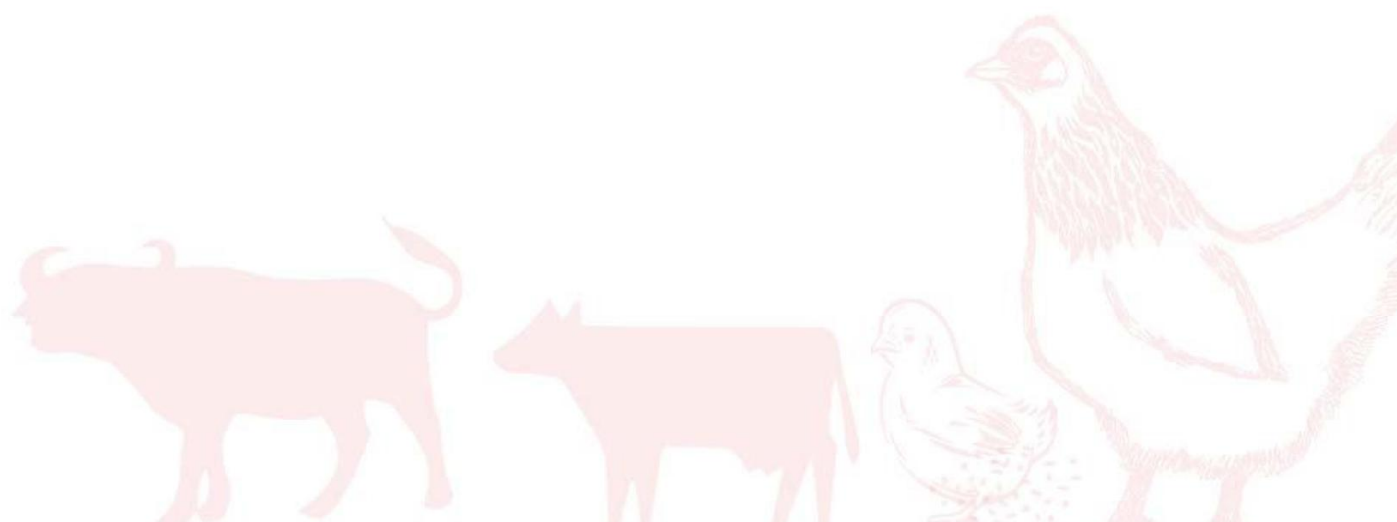

Unless advised otherwise by a veterinarian;

250 - 500 gr of NUTRI C+ can be used to 1 tonne water of drinking water.

Before applying, pre-mixture is recommended in warm water and then It can be poured into a water tank.

Packaging Shape: 1 Kilograms of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRIVIT

Use in order to meet the vitamin needs of layer, broiler, chick, cattle, sheep, goat.

- Has high bioavailability.
- Support protection for metabolism disease which is consist of unbalanced feed nutrition agents and solve.
- Effective for regular growth of body bones.
- Improve immune system.
- Provides faster increase of live weight of broilers and helps improve quality of meat and carcass.
- Support and improve metabolism of liver.
- Prevention or treatment of vitamins deficiencies.
- In conditions of stress (transport, vaccinations, high temperatures,diseases).
- Achieve faster growth.
- Increase appetite in fattening animals.
- Increases the egg production.
- Improvement of feed conversion.

Ingredients:

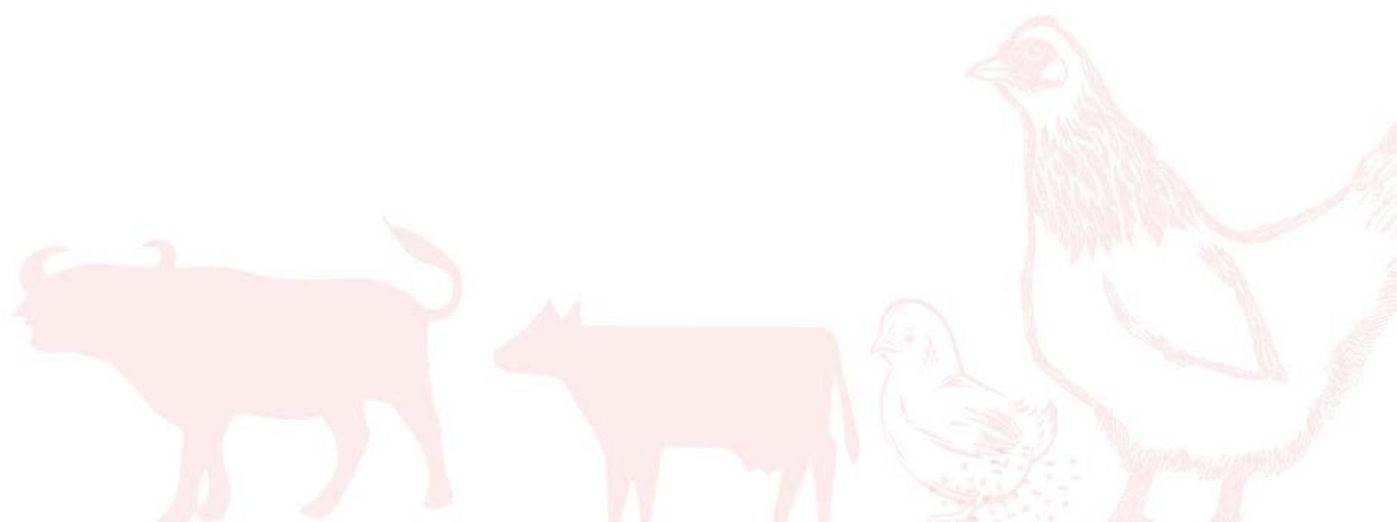

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B1, Vitamin B2, Vitamin B3 (Niacine), Vitamin B5, Vitamin B6, Vitamin B7 (Biotine), Vitamin B9, Vitamin B12, Vitamin K3, Vitamin C

Method of Application:

Unless advised otherwise by a veterinarian;
It can be used 100 gr to 1 tonne water of drinking water.

Packaging Shape: 100 Gr. Aliminium packing

Storage: It should be protected from moisture
and stored in the dry, cool and dark places.

NUTRI ACK LIQUID

- Helps to eliminate vitamin deficiency.
- Helpful for utilization from feed and prevention of low body weights.
- Supports the development of the skeleton.
- Supports the hair and wool quality.
- Used to eliminate the needs of Vitamin ACK during the milking and pregnancy period.

Ingredients:

Vitamins: Vitamin A, Vitamin C, Vitamin K3

Method of Application:

Unless advised otherwise by a veterinarian;

250 - 500 ml of NUTRI ACK LIQUID can be used to 1 tonne water of drinking water.

Pre-mixture is recommended in 1 lt of warm water.

Packaging Shape: 100 ML and 1 Liter of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI ADEK-C LIQUID

- Helps to eliminate vitamin deficiency.
- Helping for utilization from feed and low body weights to prevent.
- Supports the development of the skeleton.
- Supports the hair and wool quality.
- Used to eliminate the needs of Vitamin ADEK-C during the milking and pregnancy period.

Ingredients:

Vitamins: Vitamin A, Vitamin D, Vitamin E, Vitamin C, Vitamin K3

Method of Application:

Unless advised otherwise by a veterinarian;

250 - 500 ml of NUTRI ADEK-C LIQUID can be used to 1 tonne of drinking water. Pre-mixture is recommended in 1 lt of warm water.

Packaging Shape: 100 ML and 1 Liter of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI AD3-E LIQUID

- Used for reinforcing when there are lack of Vitamin AD3 and Vitamin E .
- Necessary for osteogenesis, seeing and growth.
- Regulates the calcium and phosphorus metabolism in the body.
- Protects cells that are important for immune system from oxidation

Ingredients:

Vitamin A, Vitamin D3 and Vitamin E

Method of Application:

Unless advised otherwise by a veterinarian;
250-500 gr of NUTRI AD3-E POWDER can be used to
1 tonne water of drinking water.

Before applying , pre-mixture is recommended in warm
water and then It can be poured into a water tank.

Packaging Shape: 100 ML and 1 Liter of plastic packing.

Storage: It should be protected from moisture
and stored in the dry, cool and dark places.

NUTRI BCK LIQUID

Includes high quantity of B1, B2, B6, B12 Vitamins in order to meet the needs of vitamin
of layer, broiler, chick, cattle, sheep, goat.

Use for reinforcing the following cases;

Feed conversion, Lack of growth and development, Reduction in milk yield,
Ended up throwing problems, Progeny incontinence, Low body weight of calves, Blind at birth
of calves, Increasing benefit from the feed in livestock, Accelerating the live weight gain,
Foot pain, paralysis and lameness, Reduction in the quality of wool and hair, eliminates
the need of B vitamins in pregnancy and milking period.

Ingredients:

Vitamins: Vitamin B1, Vitamin B2, Vitamin B3, Vitamin B5, Vitamin B6, Vitamin B7,
Vitamin B12, Vitamin K3, Vitamin C

Method of Application:

Unless advised otherwise by a veterinarian;
250 - 500 ml of NUTRI BCK LIQUID can be used to 1 tonne of drinking water.

Packaging Shape: 100 ML and 1 Liter of plastic packing.

Storage: It should be protected from moisture
and stored in the dry, cool and dark places.

NUTRI SELEN-E LIQUID

- Use for Selenium and Vitamin E reinforcing.
- Prevents delay in growth depends on the Selenium and Vitamin E deficiency.
- Avoid nutrition-related loss of reproductive efficiency.
- Use for Poor pasture-fed animals in terms of selenium.
- Indicated for prevention and treatment of muscular dystrophy, encephalomalacia.
- Exudative diathesis, low egg production, poor hatchability and stimulates antibody protection, improves resistance to disease.

Ingredients:
Vitamin E, Selenium

Method of Application:

Unless advised otherwise by a veterinarian;
Poultry: 250 ml of NUTRI SELEN-E LIQUID can be used to 1 tonne of drinking water.

Calf: It is used 5-10ml per animal/day.

Cow: It is used 40-50 ml per animal/day.

Sheep: It is used 10-20ml per animal/day.

Lamb: It is used 5-10 ml per animal/day.

Packaging Shape: 100 ML. and 1 Liter of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

PRO X POWER

Given 3-6% of propylene glycol of Consumed feed before birth, was determined increased milk yield and decreased risk of ketosis formation. Promotes ratio of volatile fatty acid and also acetate and butyrate in the blood. Increases value of glycogen in the blood. Stimulates gluconeogenesis.

Ingredients:
Sorbitol, Propylene glycol,

Method of Application:

Unless advised otherwise by a veterinarian;

Ruminant : 3-5 Days before of birth 300-500 ml /day

3-5 Days after of birth 300-500 ml

Sheep: After birth and as supportive of energy 20-30 ml /day for 3-5 days

Packaging Shape: 500 ML of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI RUM-AMINO

NUTRI RUM-AMINO is liquid feed supplement for Calves, Cows, Sheeps, Lambs, Goats.

- Used in all cases of ipovitaminoses and avitaminoses.
- Helps animals health conditions, also makes animals to build a strong organism at cases of tiredness,
- Recommended that issuing at the growth and periods of adaption and intensive stock farming.
- Prevention or treatment of vitamins and amino acids deficiencies
- Prevention or treatment of stress
- Improves feed conversion
- Support immunity system and increase resistance of body to diseases.

Ingredients:

Amino Acids: Alanine, Arginine, Aspartic acid, Cystine, Phenylalanine, Glycine, Glutamic acid, Histidine, Isoleucine, Leucine, Lysine, Methionine, Proline, Serine, Tyrosine, Treonine, Tyrtophane, Valine
Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin C, Vitamin B1, Vitamin B2, Vitamin B3, Vitamin B5, Vitamin B6, Vitamin B9, Vitamin B12

Method of Application:

Unless advised otherwise by a veterinarian;
500 - 1000 ml of NUTRI RUM-AMINO can be used to 1 tonne of drinking water.

Packaging Shape: 1 Liter of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRIMIN LIQUID

Used in order to meet the Vitamin C and Mineral needs of Layer, Broiler, Chick, Cattle, Sheep, Goat

Ingredients:

Vitamins: Vitamin C

Organic Minerals: Amino Acid Chellated Zinc, Amino Acid Chellated Manganese, Amino Acid Chellated Copper, Amino Acid Chellated Ferrous

Inorganic Minerals: Selenium, Magnesium, Phosphorus.

Method of Application:

Unless advised otherwise by a veterinarian;
1 - 3 lt of NUTRIMIN LIQUID can be used to 1 tonne of drinking water.

Packaging Shape: 5 Liters of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI MINOIL

Natural Digestive Stimulant, Respiratory Effects & Appetite Enhancer for Pullets, Layers, Broiler, Turkey, Breeders, Sheeps, Goats and Cattles.

- NUTRI MINOIL is a Herb Oil preparation operating protectively on the upper airway. Herbs helps to clear the airways of pollution.
- Enteric and respiratory effects of ND.
- Respiratory and breathing problems from CRD.
- Dissolving mucus, expectorant, bronchodialator.
- It is a natural solution for feed instead of using antibiotics having many harmful side effects.
- Stimulates endogenous enzymes in digestive system.
- Regulates ecological balance of micro flora in digestive system.
- Prevents psychical stres reducing pressure on liver.
- Prevents lack of performance during ration change period.
- Keeps stability of digestion canals during mould period.
- Works perfect all together with other feed additives except for live yeast culture.
- It is antibacterial and anti-fungal.
- It is possible to use it while medicals are used, never causes any residue on animal product.
- It is not toxic and mutagenic.
- It is environmentally friendly and 100 % natural.

Ingredients:

Menthol, Peppermint Oil, Eucalyptus Oil, Carvacrol (Oregano Oil), Thymol (Oregano Oil), Daphne Oil Propylene Glycol

Method of Application: Unless advised otherwise by a veterinarian; 200 ml of MINOIL can be used by mixing to 1 tonne water of drinking water.

Packaging Shape: 100 ML and 1 liter of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI Z-POWER

Z-Power is a complex product that includes vitamins, amino acids, aromatic oils.

- Z-power increases performance of animals to highest level and it decreases yield losses to lowest.
- Increases live weight gain on broilers. It increases quality of meat.
- Strengthens healthy of bone and so helps reduce foot problems.
- Essential oils in it that promotes healthy of respiratory system and so it helps reduce problems. It decreases using of antibiotic.
- Organic acids in it that protects intestine health, increases the benefit from feed and decreases FCR.
- Increases egg yield and quality on broilers. It extends egg shell life and increases shell quality.
- Decreases heat stress on poultry.
- Increases live weight gain on turkeys.

Ingredients:

Methionine, Treonine, Valine, Alanine, Arginine, Aspartic acid, Phenylalanine, Glycine, Glutamic acid, Isoleucine, Leucine, Lysine, Proline, Tyrosine, Vitamin A, Vitamin D3, Vitamin E, Vitamin B2, Vitamin B3, Vitamin B5, Vitamin B9, Vitamin C, Aromatic Oils, Propionic acid, Formic acid, Acetic acid and Propylene glycol

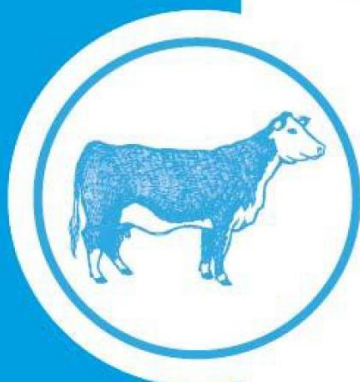

Method of Application: Unless advised otherwise by a veterinarian;

500- 1000 ml of NUTRI Z-POWER can be used by mixing to 1 tonne water of drinking water on poultry.

Packaging Shape: 100 ML and 1 Liter of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

MAXIRUMIN - SC

Vitamin, Mineral, Active Yeast Concentrate Premix for Ruminant Feed

- MAXIRUMIN - SC is used to support the vitamin needs of stock and milker animals, ensure the increasing efficiency by augmenting the usage of the feed and to increase their resistance for illnesses.
- Supply daily necessary vitamins, minerals, calcium, phosphorus and sodium for animals.
- Decrease problems of holding semen, latent escalation, lateness of gravidity
- Preventive for lameness and nail problems causing of wrong feeding on dairy cattle and calf
- Increase milk production, milk fat and milk protein values.
- Make stronger and brighter of leather, hair, nails.
- With Yeast, Maxirumin - SC increase feed intake rate and reduce Rumen Acidosis.
- Support immunity system and increase resistance of body to diseases.
- Have supportive effective on stress causing from changing feed rations.
- Within Toxin binder, Maxirumin - SC bind the toxins which can be infected from feed raw material to animals and increase their performances.
- Decrease somatic cell count with subclinic mastitis.
- Within Special Aromas, Maxirumin - SC increase appetite of animals.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B3 (Niacine), Vitamin B7 (Biotine)

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium, Sodium Bi Carbonate, DCP

Active Yeast: Sacc. Cerevicia 1026

Other Ingredients: Aroma, Active Clinoptilolite, BHT, Caco3.

Method of Application:

Unless advised otherwise by a veterinarian;

It is used 10 kg to 1 tonne feed.

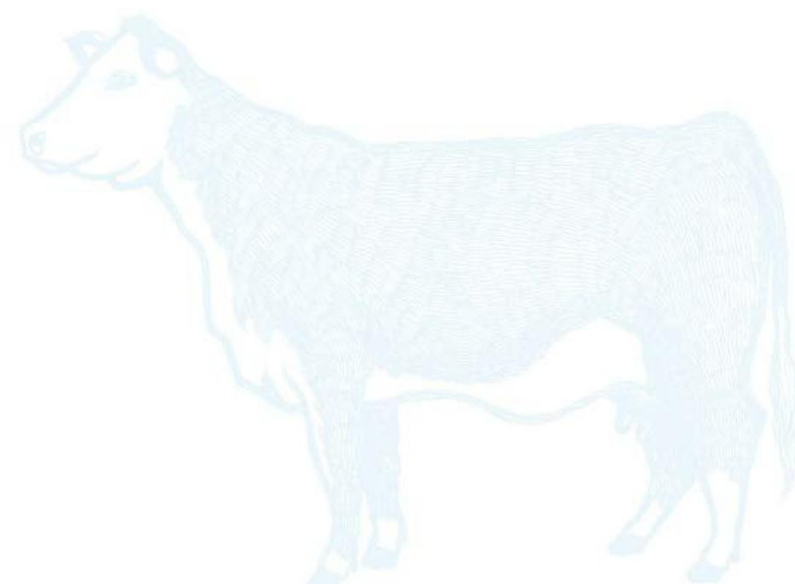

For Dairy Cattle: 70 gr - 100 gr/day per animal.

For Calf and Heifer: 50 gr - 100 gr/day per animal.

For Sheep and Goat: 7 gr - 10 gr/day per animal

Packaging Shape: 10- 20 Kilograms of plastic packing.
: 5 - 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

MAXIRUMIN PASHA

Vitamin, Mineral Concentrate Premix for Ruminant Feed

- MAXIRUMIN PASHA is used to support the vitamin needs of beef animals, ensure the increasing efficiency by augmenting the usage of the feed and to increase their resistance for illnesses.
- Supply daily necessary vitamins, minerals, calcium, phosphorus and sodium for animals.
- Preventive for lameness and nail problems causing of wrong feeding on dairy cattles and calfs
- Make stronger and brightner of leather, hair, nails.
- With Yeast, MAXIRUMIN PASHA increase feed intake rate and reduce Rumen Acidosis.
- Support immunity system and incrase resistance of body to deseases.
- Have supportive effective on stress causing from changing feed rations.
- With Toxin binder, MAXIRUMIN PASHA bind the toxins which can be infected from feed raw material to animals and increase their performances.
- Decrease somatic cell count with subclinic mastitis.
- Within Special Aromas, MAXIRUMIN PASHA increase appetite of animals.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B3 (Niacine), Vitamin B7 (Biotine)

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium, Sodium Bi Carbonate, DCP

Other Ingredients: Aroma, Active Clinoptilolite, BHT, Caco3.

Method of Application:

Unless advised otherwise by a veterinarian;

It is used 10 kg to 1 tonne feed.

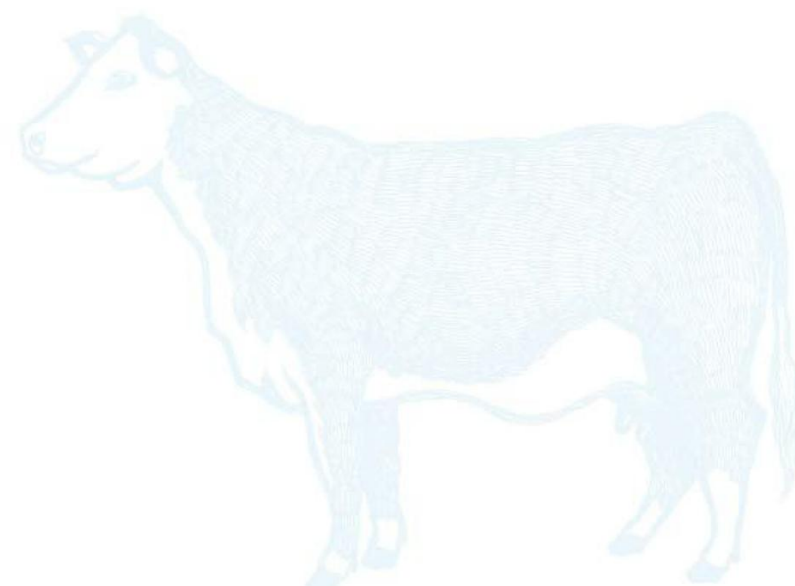

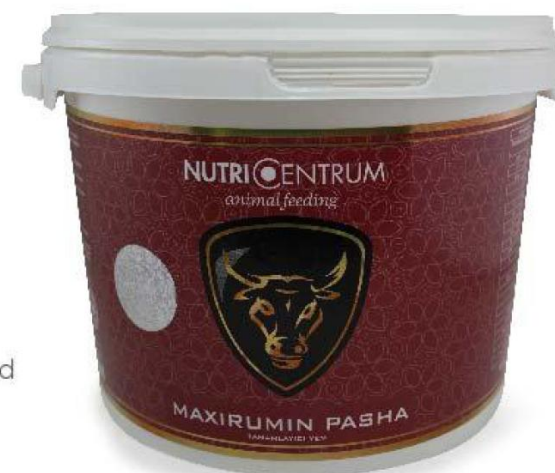

For Dairy Cattles: 70 gr - 100 gr/day per animal.

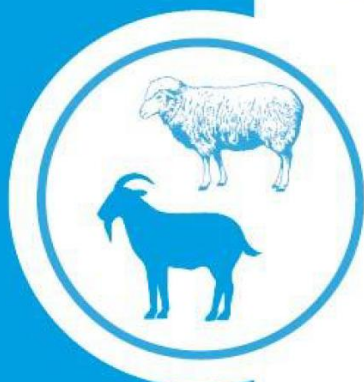

For Calf and Heifer: 50 gr - 100 gr/day per animal.

For Sheep and Goat: 7 gr - 10 gr/day per animal

Packaging Shape: 10- 20 Kilograms of plastic packing.
: 5 - 25 Kilograms of craft bags

Storage: It should be protected from moisture
and stored in the dry, cool and dark places.

NUTRIMIX 100 SC-B SHEEP & GOAT

Vitamin, Mineral, Active Yeast Concentrate Premix for Sheep and Goat

- NUTRIMIX 100 SC-B is used to support the vitamin needs of Sheep and Goats, ensure the increasing efficiency by augmenting the usage of the feed and to increase their resistance for illnesses.
- Supply daily necessary vitamins, minerals, calcium, phosphorus and sodium for animals.
- Increase milk production, milk fat and milk protein values.
- With Yeast, NUTRIMIX 100 SC-B increase feed intake rate
- Support immunity system and increase resistance of body to diseases.
- Have supportive effective on stress causing from changing feed rations.
- Within Toxin binder, NUTRIMIX 100 SC-B bind the toxins which can be infected from feed raw material to animals and increase their performances.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B1, Vitamin B3 (Niacine), Vitamin B7 (Biotine)

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium, Sodium Bi Carbonate, DCP, Magnesium

Active Yeast: Sacc. Cerevicia 1026

Other Ingredients: DL-Methionine, Aroma, Active Clinoptilolite, BHT, Caco3.

Method of Application:

Unless advised otherwise by a veterinarian;

It is used 10 kg to 1 tonne feed.

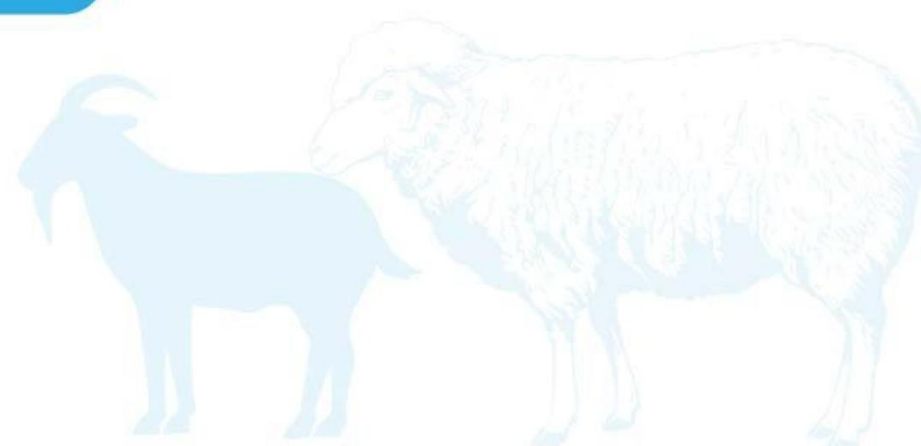

For Dairy Cattles: 70 gr - 100 gr/day per animal.

For Calf and Heifer: 50 gr - 100 gr/day per animal.

For Sheep and Goat: 7 gr - 10 gr/day per animal

Packaging Shape: 10- 20 Kilograms of plastic packing.
: 5 - 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

NUTRI CALF

For dairy calf & beef calf

- NUTRI CALF a mixture of high quantity of vitamins which includes Biotin, Niacine, Active Yeast and Organic Minerals in order to meet the vitamins and trace minerals needs of calf.
- The most important factor in determining the profitability of the cattle business is to raise healthy calf.
- NUTRI CALF is a formula that includes Vitamins, Organic minerals, Inorganic minerals and Active yeast which is calf needs to be healthy.
- NUTRI CALF increases the growth rate of calf.
- NUTRI CALF effective in respiratory problems.
- NUTRI CALF supports beneficial bacteria in the digestive system and increases feed conversion ratio.
- NUTRI CALF reduces diarrhea and prevents toxication.
- NUTRI CALF minimizes the disease risk of calves in periods of stress.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B1, Vitamin B2, Vitamin B3 (Niacine), Vitamin B5, Vitamin B6, Vitamin B7 (Biotin), Vitamin B12,

Organic Minerals: Amino Acid Chellated Zinc, Amino Acid Chellated Manganese, Amino Acid Chellated Copper,

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium, Magnesium, Calcium, Phosphorus.

Active Yeast: Sacc. Cerevicia 1026

Other Ingredients: Aroma, Active Clinoptilolite, BHT, Caco3.

Method of Application:

Unless advised otherwise by a veterinarian;

- It is used 1 kg to 1 tonne feed.
- It is mixed 10-15 gr to warm milk or feed for each calf.

Packaging Shape : 200 Gr. of plastic packing.

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

MINTOX PLUS TOXIN BINDER

High production capacity of poultry.

- Its a binder for mycotoxin especially aflatoxin. Mintox Plus increase animals productivity and health conditions. Its a complex of active Clinoptilolite which has high toxin binding capacity.
- With excellent fluidity and anti hardening, stimulated population of microorganism which is lives inside of fertilizer in poultry farms, reduce smell of fertilizer and neutralized pH of fertilizer.
- Decrease pH values in digetive system and prevent growth of bacterial like E.Coli, Salmone
- With support of enzyme production in digestive system, increase performance of poultry.
- Improve eggshell quality of eggs, helps decrease of dirty egg problem.
- It prevents harm to animals of mycotoxin arising from corn silage and beet pulp.
- Protects the liver from toxins.
- It is important for human health, toxins can pass from milk to human.
- It strngthens the immune system and increases the resistance against disease.
- It includes butyric acid that is very important for intestinal health.

Ingredients:

Lactic Acid, Citric Acid, Acetic Acid, Formic Acid, Propionic Acid, Copper Sulphate, Inactive Yeast and Active Clinoptilolite.

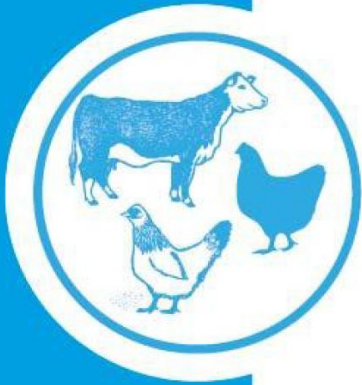

Method of Application:

Unless advised otherwise by a veterinarian;
2 kg of Mintox Plus is mixed to each tonne of feeds.
Dairy Animals: 20 gr/day
Beef Animals: 20 gr/day
Sheeps: 5 gr/day

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

SHELL POWER

Proven Solution for Egg Thickness

- Supports needs of trace element in organism,
- Has high bioavailability,
- With its high bioavailability and oligo elements which them inside of system and increase the activity of enzymes, provides more utilization from feeds,
- Support protection for metabolism disease which is consist of unbalanced feed nutrition agents and solve deficiency of mineral because of insufficient feeding,
- Effective for regular growth of body bones,
- With Mineral chelates play active roles about endocrine system,
- Improve poultry immune system and raise egg production rate,
- Supports poultry after using antibiotics and vaccination,
- Improve eggshell quality and make stabilization of inside quality of eggs
- Raise shelf life of eggs
- Helps get higher efficiency of incubation and egg quality from broiler and layers,
- Doesn't left any residual in final products,
- Doesn't contain high metals and toxic materials.

Ingredients:

Vitamins: Vitamin D3, Vitamin C

Organic Minerals: Amino Acid Chelated Zinc, Amino Acid Chelated Manganese, Amino Acid Chelated Copper, Amino Acid Chelated Iron, Amino Acid Chelated Selenium

Inorganic Minerals: Iodine, Cobalt, Magnesium

Other Ingredients: Sodium Bi Carbonate, Inactive Yeast

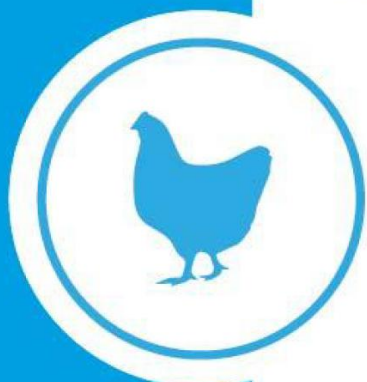

Method of Application:

Unless advised otherwise by a veterinarian; It is used 2 kg to 1 tonne feed.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

KARBROMIX BROILER CONCENTRATE PREMIX

Easy solution for feed problems

- Solve easily and perfectly problems of producing feed for broilers,
- Supports feeding of your broilers with balance and provides uniformity of herd,
- Karbromix has optimum values salmonella inhibitor, anticoccidial, antioxidant, toxin binder and mold inhibitor for your broilers,
- Our vitamins and minerals which is we using in formulations of Karbromix has the best quality and best purity rates,
- Provides faster increase of live weight of broilers and helps improve quality of meat and carcass,
- Decrease your cost for producing your feeds of broilers and provide flexibility for your feed formulations
- Add values to your feed and your products.

Ingredients:

Soybean, Corn Gluten, DCP & MCP, Amino Acids, Vitamins, Minerals, Enzymes, Toxin binder, Organic Acid, Antioxidant, Anticoccidial.

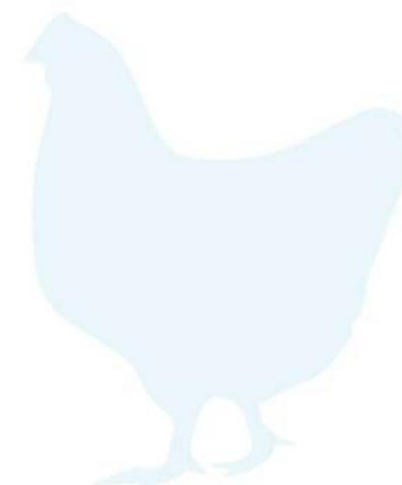

Method of Application:

Unless advised otherwise by a veterinarian;

Based on percentage (%) of concentrate like %2,5, %5, %10 and %30.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

KARYUMIX LAYER CONCENTRATE PREMIX

Easy solution for feed problems

- Solve easily and perfectly problems of producing feed for layers.
- Helps to solving of Layers live weight problems end and increase uniformity of herd.
- Improve quality of eggshell and reduce dirty eggshell problems.
- Karyumix has optimum values of vitamin, amino acid, enzyme, salmonella inhibitor, toxin binder for your layers.
- If you have troubles about inside of eggs, Karyumix solve this problems for you and create perfectly inside quality of eggs.
- Karyumix supports more rich albumin for you and your eggs yellow become more charming for your costumers.
- Extend your eggs shelf life.
- Decrease your cost for producing your feed of layers.
- Add values to your feed and your products.
- It is the easiest and most accurate solution of mixture problems in fodder factory.
- Egg weights become more balanced.
- It balances metabolism activities through pure vitamins and natural minerals it contains.
- All the vitamins, minerals, amino acids, enzymes, salmonella inhibitors, toxin binding agents are contained in Karyumix in the optimum amount to meet the needs.
- Provides special formulations for your enterprise by considering age, breed, efficiency live weight and general care conditions of the herd.
- It eliminates your storage problems.
- Due to its concentrated nutrients in the formulation, it enables usage of cheaper raw materials in rations.

Ingredients:

Soybean, Corn Gluten, DCP & MCP, Amino Acids, Vitamins, Minerals, Enzymes, Toxin binder, Organic Acid, Antioxidant, Anticoccidial.

Method of Application:

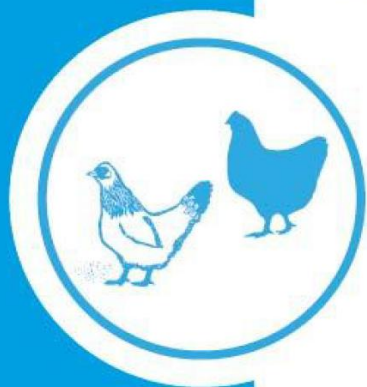

Unless advised otherwise by a veterinarian;

Based on percentage (%) of concentrate like %2,5, %5, %10 and %30.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

VECTRO BROILER PREMIX

For support Vitamin and Mineral needs of broilers

- Contains variety of vitamins and minerals which are very important for poultry.
- Supports poultry growth and lower feed conversion.
- Supports strong bones and reduces leg diseases.
- Helps to increase the rate of absorption of nutrients when under stress press because of electrolyte balance.
- Provides faster increase of live weight of broilers and helps improve quality of meat and carcass.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B1, Vitamin B2, Vitamin B3 (Niacine), Vitamin B6, Vitamin B12, Vitamin K3, Vitamin B9 (Folic Acid)

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium,

Other Ingredients: Choline Chloride, BHT, Caco3.

Method of Application:

Unless advised otherwise by a veterinarian;

It is used 2,5 kg to 1 tonne feed.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

VECTRO LAYER PREMIX

For support Vitamin and Mineral needs of layers.

- Increase the egg ratio.
- Improves chicken growth and reduces mortality.
- Prevents deficiency diseases.
- Builds resistance to fight against infection and stress.
- Reduces the feed costs.
- Gives a choice for a better feed ratio.
- Extend eggs shelf life.
- Egg weights become more balanced.
- Improve quality of eggshell and reduce dirty eggshell problems.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B1, Vitamin B2, Vitamin B3 (Niacine), Vitamin B6, Vitamin B12, Vitamin K3, Vitamin B9 (Folic Acid)

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium,

Other Ingredients: Choline Chloride, BHT, Caco3.

Method of Application:

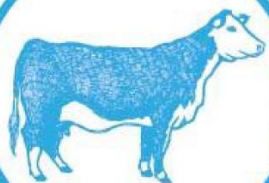

Unless advised otherwise by a veterinarian;

It is used 2,5 kg to 1 tonne feed.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

VECTRO CATTLE PREMIX

For Highly Efficient Feeds.

- Supply daily necessary of vitamins, minerals for dairy animals.
- Decrease problems of holding semen, latent escalation, lateness of gravidity on animals.
- Preventive for lameness and nail problems causing of wrong feeding on dairy animals.
- Increase milk production, milk fat and milk protein values.
- Make stronger and brightner of leather, hair, nails.
- Support immunity system and increase resistance of body to deseases.
- Have supportive effective on stress causing from changing feed rations.
- Within Toxin binder, Vectro Cattle Premix bind the toxins which can be infected from feed raw material to animals and increase their performances.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B3 (Niacine), Vitamin B7 (Biotine)

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium, Magnesium

Other Ingredients: Aroma, Active Clinoptilolite, BHT, Caco3.

Method of Application:

Unless advised otherwise by a veterinarian;

10 kg of Vectro Cattle Premix is mixed to each tonne of Dairy Animal Feeds.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

VECTRO BEEF PREMIX

For Highly Efficient Beef Animal Feeds.

- Supply daily necessary of vitamins, minerals for beef animals.
- Preventive for lameness and nail problems causing of wrong feeding on dairy animals.
- Increase meat production and meat quality.
- Make stronger and brightner of leather, hair, nails.
- Support immunity system and incrase resistance of body to deseases.
- Have supportive effective on stress causing from changing feed rations.
- Within Toxin binder, Vectro Beef Premix bind the toxins which can be infected from feed raw material to animals and increase their performances.

Ingredients:

Vitamins: Vitamin A, Vitamin D3, Vitamin E, Vitamin B3 (Niacine), Vitamin B7 (Biotine)

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Selenium, Magnesium

Other Ingredients: Aroma, Active Clinoptilolite, BHT, Caco3.

Method of Application:

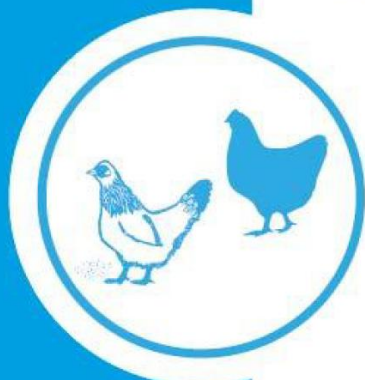

Unless advised otherwise by a veterinarian;

10 kg of Vectro Beef Premix is mixed to each tonne of Beef Animal Feeds.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

VECTRO GROWTH PROMOTER

Take the Control of Growing.

- Vectro Growth Promoter is a natural growth promoter designed for poultry that regulates the pH of gastro-intestinal system, controls the growing of pathogenic microorganisms, stimulating the beneficial bacteria, strengthen the immune system.
- Organic acids help to regulate pH of digestive system. This effect allows to better control on contaminations, improves the digestibility and bio availability of minerals.
- Keeps the microflora under control and, stimulates the proliferation of beneficial bacteria in digestive system. Helps to maintain the integrity of intestinal system.
- Stimulates the secretion of digestive enzymes.
- Vectro Growth Promoter has antibacterial and antioxidant effects also improve the immune system of poultry.

Ingredients:

Sodium Aluminum Silica, Active Yeast, Inactive Yeast, Vitamin A, Vitamin D3, Vitamin C, Vitamin E, Selenium, Protease, Xylanase, Glucanase, Lactic Acid, Citric Acid, Acetic Acid, Formic Acid, Propionic Acid.

Method of Application:

Unless advised otherwise by a veterinarian;
It is used 1 kg to 1 tonne feed.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.

VECTRO MINERAL PREMIX

• Supports needs of trace element in organism,

- Support protection for metabolism disease which is consist of unbalanced feed nutrition agents and solve deficiency of mineral because of insufficient feeding,
- Effective for regular growth of body bones,
- Improve poultry immune system and raise egg production rate,
- Supports poultry after using antibiotics and vaccination,
- Improve eggshell quality and make stabilization of inside quality of eggs
- Raise shelf life of eggs
- Helps get higher efficiency of incubation and egg quality from broiler and layers,
- Doesn't left any residual in final products,
- Doesn't contain high metals and toxic materials.

Ingredients:

Inorganic Minerals: Ferrous, Zinc, Manganese, Copper, Iodine, Cobalt, Magnesium

Method of Application:

Unless advised otherwise by a veterinarian;
It is used 1 kg to 1 tonne feed.

Packaging Shape : 25 Kilograms of craft bags

Storage: It should be protected from moisture and stored in the dry, cool and dark places.
